```

OUTPUT

Enter real component of 1st number:

-3

Enter imaginary component of 1st number:

4

Modulus = 5.0000

Argument (deg) = 126.8699

Enter real component of 2nd number:

3

Enter imaginary component of 2nd number:

-4

Modulus = 5.0000

Argument (deg) = 306.8699
